

Janus C4 Milestone Datasheet

Part number: JC4-INT-MIL

About the Milestone Integration

Janus C4 is a powerful yet easy-to-use access control system that allows users to manage and monitor physical access to sites. It integrates access control, alarm and incident monitoring and comprehensive reporting facilities.

Janus C4 supports interfaces to third-party security systems such as alarms and CCTV systems. The Milestone Interface is an optional, separately licensable module that provides an interface between Janus C4 and one or more Milestone VMS systems. It enables Janus C4 users to view live feeds from Milestone connected cameras, review CCTV images historical and to send Pre-sets to the Milestone VMS.

Overview of the Interface

The Janus C4 access control system can be integrated with the Milestone XProtect VMS. Integration is managed by a separate, licensable Janus C4 module which manages communication with the Milestone VMS.

Functionality

The Milestone Interface module includes the following functionality:

- It enables viewing of camera images in real time from the Janus C4 interface.
- It enables viewing of historical camera images from the Janus C4 interface.
- It allows PTZ (Pan tilt zoom) commands on any of the Milestone connected cameras, that support PTZ from the Janus C4 interface.
- It allows sending preset commands from the Janus C4 interface to the Milestone VMS.
- It allows the setting up of a videowall for viewing many CCTV streams

Prerequisites

The Milestone interface module requires the following components to be ready to allow the interface commissioning to run successfully:

- A Janus C4 licence for the Milestone integration.
- A Milestone server configured with its associated cameras.
- A copy of the Milestone MIP SDK. This can be requested from Grosvenor Technology.
- Administrator account access on the Janus C4 server.

Milestone XProtect Supported Versions

The Milestone interface with Janus C4 supports the following versions of the XProtect software:

XProtect Edition	2014	2016	2017 R2	2018
Essential+	✗	✗	✗	✗
Express	✓	✓	✓	✗
Express+	✗	✗	✗	✗
Professional	✓	✓	✓	✗
Professional+	✗	✗	✗	✗
Expert	✗	✗	✗	✗
Corporate	✗	✗	✗	✗

Please ensure that the Milestone XProtect server is installed and licensed for a supported version of the Janus C4 Milestone interface before proceeding.
