

Janus C4 Active Directory Integration Datasheet

Part number: JC4-INT-AD

Overview

Microsoft is a leading global vendor of computer software, hardware, mobile and gaming systems and cloud services. Active Directory is a directory service that Microsoft developed for Windows domain networks and is included in most Windows Server operating systems as a set of processes and services.

The Active Directory integration into Janus C4 allows users defined within specified Organisational Units (OU's) to be imported into Janus C4, saving time on creating users within Janus C4.

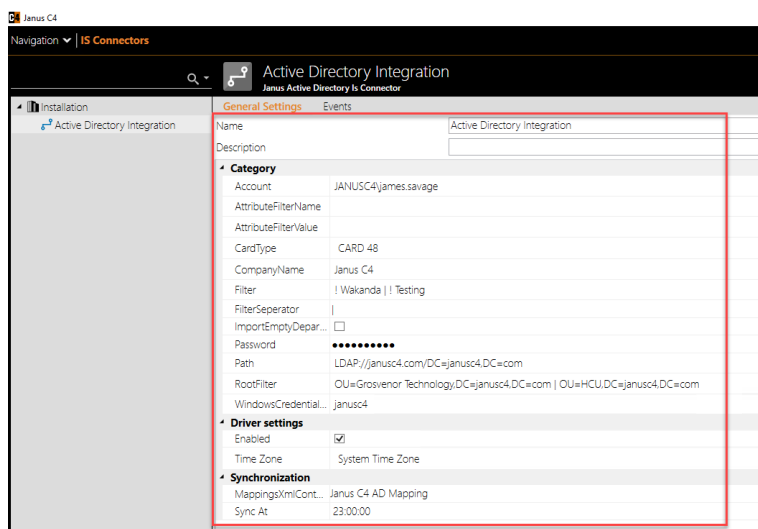

All Janus C4 system licenses contain one free license for an Active Directory Integration.
